Finish Tiles Manufacturer in Mumbai — Quality You Can Walk On

Need a reliable Finish Tiles Manufacturer in Mumbai? Metco Block Mfg. Co. delivers precision-made tiles with 15+ years of expertise. Call 8484930580 today.

Good tiles outlast bad decisions by decades.

That is exactly why contractors, architects, and property developers across Mumbai pay close attention to where their tiles come from — not just what they look like on a catalogue page. A trusted Finish Tiles Manufacturer in Mumbai does more than produce slabs; they deliver consistent quality, dimensional accuracy, and durability that holds up under real-world traffic, weather, and load.

Metco Block Mfg. Co., operating under the brand Paver Block and based in Taloja, Navi Mumbai, has been supplying finish tiles, paver blocks, concrete blocks, and related products to clients across Mumbai and surrounding areas since 2011. With an NSIC Certificate to its name and 15+ years of hands-on manufacturing experience, the company has built a reputation that speaks through every product that leaves its facility.

What Are Finish Tiles and Why Does Quality Matter?

Finish tiles are the final surface layer applied to floors, pathways, driveways, and outdoor areas. They bear direct exposure to footfall, vehicle weight, water, and UV radiation. A low-grade tile chips, fades, or cracks within a season or two.

High-quality finish tiles — whether shot blasted, glossy, or combi-style — maintain their surface texture, resist slipping, and hold their structural integrity for years. Getting them from a dependable Finish Tiles Manufacturer in Mumbai means you also benefit from local quality checks, faster delivery, and direct manufacturer pricing without distributor markups.

Types of Finish Tiles Available at Metco Block Mfg. Co.

Shot Blasted Finish Tiles

Shot blasting creates a slightly rough, anti-skid texture on the tile surface. This finish is particularly suitable for outdoor pavements, industrial yards, public walkways, and parking areas where safety underfoot is non-negotiable. Metco produces shot blasted chequered tiles, shot blasted border tiles, and shot blasted combi tiles for various applications.

Glossy Finish Tiles

Glossy tiles work well for commercial entrances, retail frontages, and areas where aesthetics carry weight. The smooth, polished surface reflects light cleanly and retains colour depth over time when properly maintained. Metco's glossy chequered tiles are manufactured to precise dimensional tolerances so they lay flat without lippage.

Combi Tiles

Combi tiles combine two contrasting finishes — typically one glossy and one shot blasted panel — on a single unit. This creates a visually defined surface that separates pedestrian zones from traffic lanes, a design feature frequently specified in municipal projects and large commercial complexes.

How These Tiles Are Manufactured

Metco Block Mfg. Co. uses a controlled production process that starts with properly proportioned raw materials — cement, aggregates, and additives — mixed and compacted under pressure. Curing follows strict timelines to ensure the blocks and tiles reach their rated compressive strength before dispatch.

The NSIC certification the company holds is not a display piece. It reflects process compliance, consistent raw material standards, and quality documentation that clients and government procurement teams can rely on.

Broader Product Range from Metco Block Mfg. Co.

Beyond finish tiles, the facility manufactures solid concrete blocks, hollow blocks, flyash bricks, and Metco blocks — making it a single source for multiple construction material requirements on one project. Builders working on residential towers, commercial developments, and infrastructure projects across Mumbai regularly source from this facility to keep supply chains simple and quality uniform.

Why Choose Paver Block (Metco Block Mfg. Co.)?

15+ years of manufacturing experience — the team has handled projects ranging from residential housing to large-scale municipal contracts.

NSIC Certified — a recognised quality benchmark that adds credibility to every purchase order.

Established in 2011 — over a decade of consistent supply to clients across Mumbai and nearby areas.

Open 24 hours — production and inquiry support that matches construction schedules, which rarely follow a 9-to-5.

Direct manufacturer pricing — no middlemen, which means better rates and faster resolution of any product queries.

As a Finish Tiles Manufacturer in Mumbai with this depth of experience, Metco Block Mfg. Co. brings both technical knowledge and supply reliability to every client relationship.

Frequently Asked Questions

Q1. What is the minimum order quantity for finish tiles?
Order quantities depend on the tile type and project requirement. Contact Metco Block Mfg. Co. directly at 8484930580 to discuss your specific project volumes.

Q2. Do you supply finish tiles across all areas of Mumbai?
Yes. Metco supplies to Mumbai and the surrounding areas including Navi Mumbai, Thane, and nearby regions from their Taloja facility.

Q3. What is the difference between shot blasted and glossy finish tiles?

Shot blasted tiles have a textured, anti-skid surface suited for outdoor and high-traffic areas. Glossy tiles have a smooth, polished finish preferred for commercial and decorative applications.

Q4. Are your tiles suitable for heavy vehicle traffic areas?
Yes. The concrete finish tiles manufactured at Metco are produced to withstand significant load-bearing requirements. Specific compressive strength details can be confirmed before ordering.

Q5. How do I place an order or visit your facility?
Reach Mr. Imtiyaz Patel at 8484930580 / 9821604604, visit paverblocks.co, or come directly to Plot No. 2, Behind Bharat Petrol Pump, Panvel Mahape Road, Taloja, Navi Mumbai – 410208.

Get the Right Tiles for Your Next Project
